Laraib Qadeer

Roll No: FA24-BCS-047

Assignment statement

Assignment 1 — Your Personal CV Page

Difficulty: Foundational · Covers: Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model) · Folder: assignment-1/

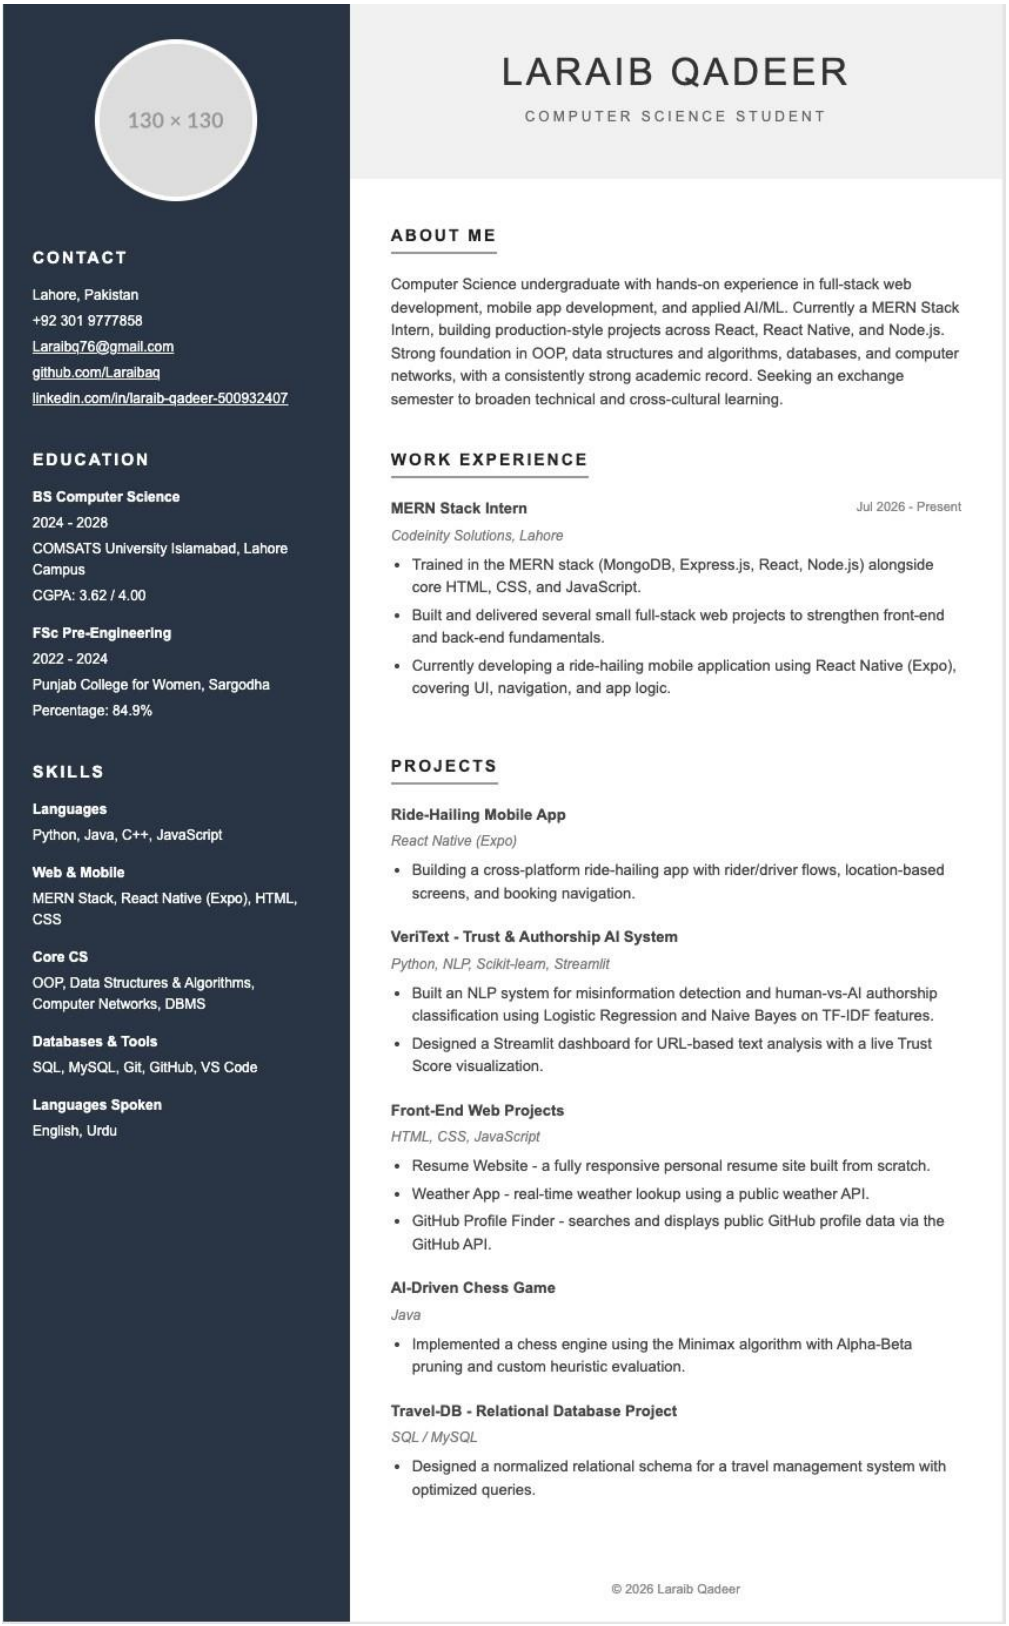

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An “About Me” section.
- An “Education” section listing your academic history in a semantic list or table.
- A “Skills” section.
- A “Contact” section with a real <a href="mailto:..."> link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout — <header>, <nav>, <main>, <section>, <article>, <footer> as appropriate, not a page built entirely out of unstyled s.
- Styling entirely in a separate styles.css file (external stylesheet, not inline style="" attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.

Deliverables in assignment-1/: index.html, styles.css, any images, and your completion PDF.

EDUCATION
BS Computer Science
2024 - 2028
COMSATS University Islamabad, Lahore Campus
CGPA: 3.62 / 4.00
FSc Pre-Engineering
2022 - 2024
Punjab College for Women, Sargodha
Percentage: 84.9%
SKILLS
Languages
Python, Java, C++, JavaScript
Web & Mobile
MERN Stack, React Native (Expo), HTML, CSS
Core CS
OOP, Data Structures & Algorithms, Computer Networks, DBMS
Databases & Tools
SQL, MySQL, Git, GitHub, VS Code
Languages Spoken
English, Urdu
ABOUT ME
Computer Science undergraduate with hands-on experience in full-stack web development, mobile app development, and applied AI/ML. Currently a MERN Stack Intern, building production-style projects across React, React Native, and Node.js. Strong foundation in OOP, data structures and algorithms, databases, and computer networks, with a consistently strong academic record. Seeking an exchange semester to broaden technical and cross-cultural learning.
WORK EXPERIENCE
MERN Stack Intern
Jul 2026 - Present
Codeinity Solutions, Lahore
Trained in the MERN stack (MongoDB, Express.js, React, Node.js) alongside core HTML, CSS, and JavaScript.
Built and delivered several small full-stack web projects to strengthen front-end and back-end fundamentals.
Currently developing a ride-hailing mobile application using React Native (Expo), covering UI, navigation, and app logic.
PROJECTS
Ride-Hailing Mobile App
React Native (Expo)
Building a cross-platform ride-hailing app with rider/driver flows, location-based screens, and booking navigation.
VeriText - Trust & Authorship AI System
Python, NLP, Scikit-learn, Streamlit
Built an NLP system for misinformation detection and human-vs-AI authorship classification using Logistic Regression and Naive Bayes on TF-IDF features.
Designed a Streamlit dashboard for URL-based text analysis with a live Trust Score visualization.
Front-End Web Projects
HTML, CSS, JavaScript
Resume Website - a fully responsive personal resume site built from scratch.
Weather App - real-time weather lookup using a public weather API.
GitHub Profile Finder - searches and displays public GitHub profile data via the GitHub API.
AI-Driven Chess Game
Java
Implemented a chess engine using the Minimax algorithm with Alpha-Beta pruning and custom heuristic evaluation.
Travel-DB - Relational Database Project
SQL / MySQL
Designed a normalized relational schema for a travel management system with optimized queries.
